Research roadshow launched this week

A CAMPAIGN to raise awareness and understanding of two debilitating conditions that can lead to blindness and physical disability is being launched in Southend by the charity PMRGCAuk.

PMRGCAuk - the patient support group for people diagnosed with polymyalgia rheumatica and giant cell arteritis - is holding a Research Roadshow on Wednesday, February 15 to raise public

awareness around the conditions and share the latest research and developments in causes, treatment and management.

The free event starts at 12.15pm in St Peter's Church Hall, Eastbourne Grove, Westcliff.

It will focus on different aspects of the conditions.

To find out more about the Southend roadshow, go to pmrgca.co.uk/news/roadshow-launch
